

JULY 2002

WELCOME TO THE JULY EDITION OF FAMILY COMPUTER NEWS
published by VONTRONICS / Family Computer USA, Naples, Florida

If you have received this newsletter by mistake or do not wish to receive it in the future, then we apologize. Please email us with details at support@familycomputerusa.com

BUSY SUMMER

A smooth transition from Family Computer USA to VONTRONICS / Family Computer USA is well underway. We have seen many familiar faces and many new ones. Our free pickup and delivery has been well received. Just call to make an appointment.

DENTISTS GO DIGITAL

We've worked with several dental offices in the area and have helped them bring computers right into the room with the patient. Using new low-radiation digital x-ray technology, dentists can now instantly view on their computer monitors the x-ray images taken of your teeth. Intra-oral cameras allow real-time full-color video images to be shown to patients of the details in their mouth. Voice-activated computer commands and dictation modes allow dentists to record procedure notes and schedule follow-up visits from chair-side.

VIRUS ACTIVITY RISING

We can't repeat it enough... Keep your Anti-Virus software updated! The number of viruses is increasing daily with at least 50,000 varieties known to date. We have seen an alarming number of systems damaged by viruses that could have been prevented with regular updating. If you need more information, just call us.

OVER 1 BILLION SERVED

The computer industry reached the 1 billion milestone for sales of personal computers in April. It took 25 years to sell this many, but analysts predict the 2 billion mark to come within 5 more years.

LOOK MA! NO WIRES

Wireless networking is becoming more popular as communication standards make connections more stable. We've installed wireless networks in several homes and small offices, connecting laptops and remote desktop systems without the need to run network cabling. This allows use of shared printers, files and high-speed Internet access from the comfort of your favorite chair.

SPECIAL ORDERS DON'T UPSET US...

We still design and assemble custom computer systems to fit your special needs. If you are a home video editing whiz, a music specialist, a photographer in need of digital assistance, or even a stock day-trader, we can help build a system especially for your needs. We work with dentists, doctors, real-estate offices, and many small businesses.

If you need a basic personal system, we suggest Office Depot, Costco or Sam's. Their prices are excellent and we can't offer a better price on a basic system.

If you need personal service, on-site or on-the-bench, that's our specialty and we love to help.

Check your surge protector now! It should protect the power plugs for all of the devices that plug into your computer. Make an extra check to verify that the same surge protector protects your modem. Keep dry during the summer storms; wear your sunscreen and thanks for reading. Now you're one of the Family!
